

DYMAXION IS MOVING

It is with excitement and great pleasure that Dymaxion is announcing to our customers, vendors and partners that on November 19th, 2018, will be opening our doors to our new [LEED Certified](#) home. Our new modern and spacious location is being built to meet Dymaxion's specific requirements to ensure that we can better serve our customers.

Our new address is 145 Hobsons Lake Drive, located within the [Bayers Lake Business Park](#). Dymaxion is building a [Tier 3 on-premises server room](#) to ensure that our cloud services exceed our customers availability expectations. In addition to our Infrastructure and Environmental improvements, this new location has plenty of convenient drive up parking spaces and an accessible private entrance for our customers to come in and see us, drop off devices to our Authorized Repair Depot, or attend one of our technology seminars.

We have been operating at 5515 Cogswell Street in downtown Halifax for 35 of our 45 years in business. We recognized that we needed to make significant improvements to our office space to better serve our customers and we would not be able to overcome the parking challenges at this location. So it was time to move. After a well vetted search we feel we have found the ideal location.

We look forward to continuing to serve you at our new address. Feel free to contact us with any questions you may have concerning the new office location or our services.

Our phone number will not change. It is still **902-422-1973** and our general email address is the same info@dymaxion.ca. Our services will be available during our move without interruption.

Please update your records with our new contact information:

Dymaxion Research Limited
145 Hobsons Lake Drive - Unit 107

Halifax, Nova Scotia, B3S 0H9

Dymaxion Research Ltd is Atlantic Canada's leading independent information technology company. Founded in 1973, Dymaxion has been providing IT solutions for business for 45 years. Dymaxion is a value added reseller and authorized service partner of top commercial IT manufacturers as well as a managed service provider for many Atlantic Canadian businesses. We are a developer of software applications such as MediaNet and Schedule 3W which have a vast international install base. Our longevity can be attributed to our passion for innovative technology and delivering consistent high quality service.
